

YUPOTako®

Sticks to flat surfaces
without adhesive!

YUPOTako® – A new temptation for the creative appetite

Tako means Octopus in Japanese. The new YUPOTako® sticks to flat surfaces just like an octopus, due to its micro suction structure. It uses no adhesive, leaving no sticky feeling on the label.

Characteristics of YUPOTako®

- Bubble free.
- Special handling or application is not required.
- Easy to stick on and easy to remove.
- Not using glue, so there is no sticky feeling and does not leave any glue on the surface due to the micro suction structure.
- The backside of YUPOTako® can be washed with water when the adhesion is weakened by dust, and it can be used correct as many times as you want.
- Not using PVC. YUPOTako® is environmentally friendly.
- Variety of grades for different printing methods.

Usage Instructions - Caution -

It is better to leave white material on mounting object (where YUPOTako® will be applied), when:

- Mounting object is printed plastic (especially PVC and Acrylic), and when leave YUPOTako® on the object for long time period;
- High temperature and high humidity such as 60°C/ 90% Rh;

White material left on the mounting object is easily wiped off by wet towel.

Not suitable for sticking on 3D object.

Not suitable for using as a sticker for cars, and for outdoor usage.

When laminating YUPOTako®, some curl can happen during applying or removal of the label.
