

Made by fishermen, for fishermen

Mighty Bright is the first coloured reflective tape available to anglers, you can choose from white, red, orange, green, blue, yellow, or even black! No other product comes close for quality or ease of use. It is also the only tape that's been specifically computer-cut in a way that best suits modern fishing rods. There's no cutting required and it's fitted in minutes.

Also available in 50 & 300mm lengths.
suitable for use on knife handles, tripods, tackle boxes, bait needles, and hundreds of other uses
Depending on blank diameter, each pack of Mighty Bright Tape, will cover 10-12" of rod tip.

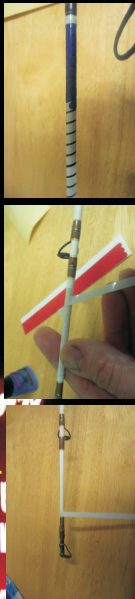

**Mighty
Bright**

**Reflective
Tip Tape**

FITTING INSTRUCTIONS:

Clean the surface to be applied to thoroughly, even new items. Begin by sticking the tape at 90° to the rod, then once it has overlapped itself, keep the tape taut and pull the tape around into a spiral and apply, overlap to continue the spiral (on some slimmer blanks it is sometimes necessary to use a dab of superglue on the ends that overlap.). Finish by pulling the end around to 90° and stick down on itself.

these ends need
to match as the union
flag goes behind
the images

size was ok @
50mm wide
x 298mm long,

the mighty bright
end is folded over,
so on the flyers
printed already,
the flag and copyright
was hidden
